

Bringing FDA Insights to Your Fingertips

ChatGMP is an AI-powered platform designed to help pharmaceutical professionals, by delivering structured, actionable insights from scattered GMP data. With features like instant query resolution, inspection tracking, and competitor benchmarking, ChatGMP saves time, enhances audit readiness, and supports informed decision-making for quality teams, business leaders, and investors.

Pharmaceutical companies face significant challenges in maintaining compliance and staying ahead of evolving regulatory standards

Keeping track of GMP focus areas targeted by FDA audits

Tracking inspectors' profiles, trends, and areas of focus

Learning from competitors' inspection reports to enhance quality

Providing critical insights to investors evaluating manufacturing facility quality

Traditional methods for gathering and consolidating this information are time-consuming and inefficient, often requiring extensive manual effort to extract meaningful insights.

ChatGMP Advantages

ChatGMP organizes vast amounts of GMP-related data into a structured, user-friendly platform, offering

Comprehensive Data

Access to all relevant FDA inspections, audits, and related data in an organized format

Smart Query Functionality

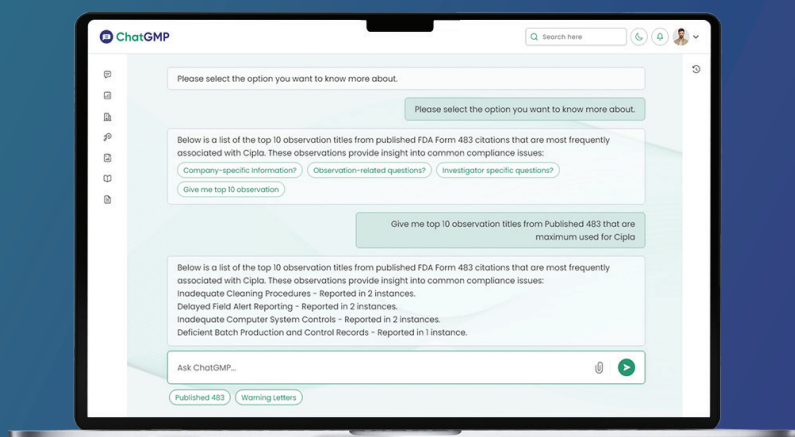

A unique chatbot feature that provides instant answers to complex questions

Versatile Data Analysis

Review data in multiple formats tailored to specific needs

Time Efficiency

Save valuable time by accessing actionable insights without manual data compilation

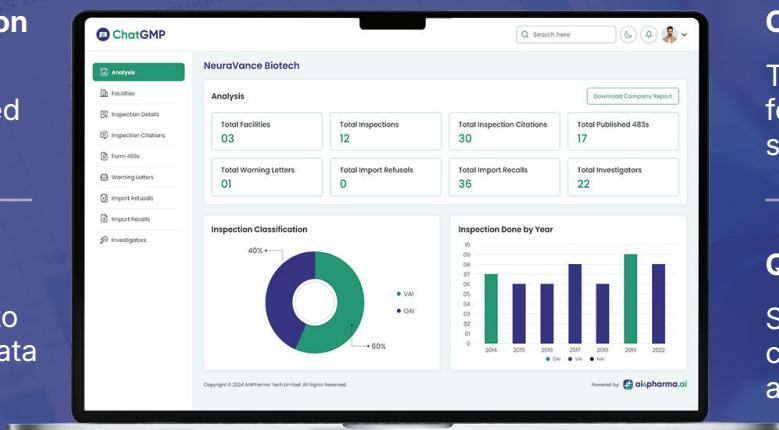

Key Features

Structured Information

Navigate seamlessly through well-organized data

Chatbot Assistance

Get quick responses to queries for efficient data retrieval

Customizable Views

Tailored data formats for various stakeholders

Quick Decision-Making

Streamlined data consolidation enables actionable insights

Who Benefits from ChatGMP?

Quality Teams

- Learn from industry inspections to improve compliance
- Benchmark against competitors' performance
- Stay audit-ready and train new employees effectively

Business & Finance Leaders

- Monitor competitors to anticipate supply chain disruptions
- Make strategic decisions based on competitors' quality issues
- Plan proactively for quality-related risks and opportunities

Investment Professionals

- Assess the compliance history and quality record of potential investment targets
- Make informed investment decisions using detailed insights

Transforming Pharma Compliance and Decision-Making

Empower your team with data-driven insights to maintain a competitive edge in the pharmaceutical industry.
